

PRESS RELEASE, 12 February 2019

wega Informatik acquires software business from Solvias

Solvias AG transferred its software business including the ARGUS/Dissolution software to Wega Informatik AG with effect of September 1st 2018.

At Wega, the software business has ideal conditions to meet the high demand for data integrity solutions and to grow further. Daniel Juchli, Head of Lab & Research IT, thinks that the acquisition of the software portfolio perfectly matches the strategy of Wega in the area of lab automation software in regulated environments.

“We are excited to welcome our new customers and promise to keep the high level of quality they are used to receive” says Stefan Waltenspiel, Managing Director and Co-Founder of Wega.

About Solvias

Solvias is a world leader in contract research, development and manufacturing (CRO/CDMO). The industries it serves include pharmaceuticals, biotech, medical devices and cosmetics. Solvias laboratories with more than 500 employees are located in Switzerland and France, both close to Basel, and operate to the highest standards and in accordance with ISO, cGMP and GLP (Hombourg).

Its service portfolio covers: Analytical Services, Small Molecule Analysis, Biopharmaceutical Analysis, Biological Analysis, Solid State Development, Ligands & Catalyst Technology, Custom Synthesis & Manufacturing. Its product portfolio covers: Chemical Hazard Monitoring, Ligands, Fiberoptic Probes and Flow Cells.

About wega Informatik

Since 25 years, Wega delivers efficient solutions for the life sciences industry and laboratories. We established ourselves as a quality service provider.

Services and solutions provided by Wega's subject matter experts, project managers and informatics specialists support our customers from early laboratory research through product development to regulatory filing and product marketing. Wega additionally supports customers in regulated areas to ensure adherence of IT systems to regulatory guidelines (Computer System Validation based on GxP and GAMP5).

Founded 1993 in Basel/Switzerland, Wega Informatik AG grew from a startup company to one of the most important and mature Life Science IT companies in the region.

Most of our more than 50 employees have a double qualification in a business domain and in information technology.
